How to turn your Phone into a hot spot.

**iPhone**

To set up a personal hotspot on your iPhone or iPad (Wi-Fi + Cellular), go to **Settings > Personal Hotspot** and toggle it on (if you don't see Personal Hotspot in Settings, tap **Cellular > Personal Hotspot**). Make note of the Wi-Fi password.
Below you can see what it looks like on a Samsung Galaxy S8 running Android 9.0 Pie. You can either pull down and tap the Mobile Hotspot option in the menu to activate. Or navigate to Connections > Mobile Hotspot and Tethering > Mobile Hotspot and toggle it on. A pop-up window will appear, where you can find the Wi-Fi password for devices that want to connect.
